Customer Letter 8 preparations
Status: 15 January 2019

Dear Customer,

Subject: Absence of REACH ‘Candidate List’ Substances in Crastin[®], Delrin[®], Elvamide[®], Minlon[®], Pipelon[®], Rynite[®], Selar[®], Sorona[®] EP and Vamac[®]

We have received a number of material declaration requests from our customers referring to REACH and the potential presence of Substances of Very High Concern (SVHC).

The intent of this letter is to clarify how the DuPont Transportation & Advanced Polymers products are affected by the REACH ‘Candidate List’.

As supplied, there are no substances intended to be released from these products as defined by article 7(1) under normal or reasonably foreseeable conditions of use.

DuPont Transportation & Advanced Polymers confirms that the above products do not contain any of the substances listed in the ‘Candidate List’* as last amended on 15th January 2019 in a concentration above 0.1% weight by weight (w/w).

DuPont Transportation & Advanced Polymers confirms that we do not add to the above products any of the substances listed on the Annex XIV to Regulation (EC) N° 1907/2006 as last amended on 13th June 2017 (Regulation (EU) No 999/2017).

We are committed to comply in every respect to the requirements of REACH and relevant amendments. At present, we do not expect any anticipated Substances of Very High Concern to be in our above products requiring reporting to the supply chain.

Should you have any question regarding the content of this letter, or any other REACH related subject, please do not hesitate to contact us.

Yours faithfully,

Dr. Line Fanichet
Regulatory Affairs Consultant

This information is based on our current level of knowledge and expresses only our intention. It does not constitute a binding obligation. Whilst the information is provided in good faith, no representations or warranties are made with regards to its completeness or accuracy and no liability will be accepted for damages of any nature whatsoever resulting from the use of or reliance on the information.

As we cannot be aware of all aspects of your business and the impact REACH Regulation may have on your company, we strongly encourage you to get familiar with REACH, its requirements and timelines.

DuPont has no intention to change its product portfolio of polymer offerings due to the introduction of REACH under the condition, that REACH does not impose commercial or technical burden, which could impact the health of our business. However, since DuPont depends on its suppliers, DuPont is not in full control of this decision. Based on industry assessments, it is likely that a certain number of chemicals will no longer be available to the European market. This may necessitate product reformulation, and subsequent product / article re-qualification, or, in more critical cases, to a complete product change.

EC number, CAS number: the EC number includes both anhydrous and hydrated forms of a substance and consequently the entries cover both these forms. The CAS number included may be for the anhydrous form only, and therefore the CAS number shown does not always describe the entry accurately.

IUCLID 5 Substance Dataset: these are partly pre-filled substance data sets in IUCLID 5.3 format. They are provided as a support for importers or producers of articles preparing notifications for substances in articles. The notifying company remains, however, solely responsible for the appropriateness and correctness of the information submitted in the notification.
